UP LIFT VULNERABLE CHILDREN AND ORPHANAGE

Dear Sir/Madam,

Re: ASCERTAINING 10 ACRES AT KIYANJA MUKUNGWE MASAKA DISTRICT.

I was called upon to carry out the above described exercise on the 15th July 2016. It was successfully done and the findings are thus;

Following the attached print 1, the lines in red connect to the corners that where well known to the person who was guiding us which to him were 10 acres. However according to the measurements, the part enclosed in red is rather 9.50 acres.

Upon declaring the 9.5 acres being for the part that was taken for 10 acres, there was an agreement over phone between the owner of the 9.5 acres and the one where the extra 0.5 was to be fetched. I was then permitted to mark off the 0.5 acres whose lines are in black.

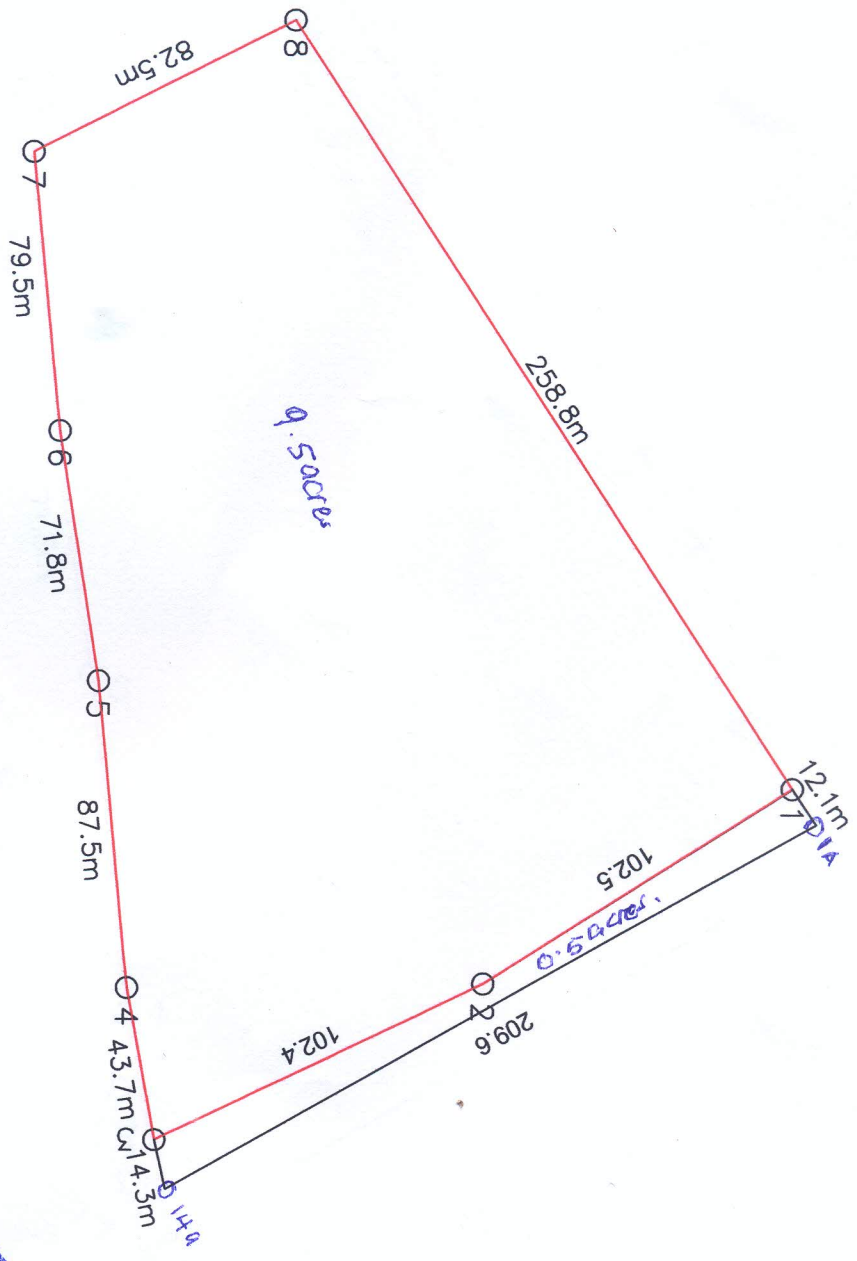

Therefore the 10 acres are line 8-1A which is the road side, line 1A -14A being the mango tree side where the extra 0.5 was acquired, line 8-7 is opposite the former and line 7-14A is the lower end as per the print attached.

In conclusion, the exercise was a success so this report is forwarded to you for your father action. Attached is also a copy of the coordinates used to obtain 10 acres.

Yours faithfully,
